Bloomfield Township received funding of $125 per tree for eighty-nine trees for a grand total of $11,125 through our membership with the Alliance of Rouge Communities (ARC). The ARC applied for and received funding to disperse to its member communities including Bloomfield Township. The Restoring Tree Canopy in the Rouge River Area of Concern grant to plant native trees within public right of ways and within public properties is funded by the US Department of Agriculture-Forest Service. The Engineering and Environmental Services Department along with Department of Public Works selected 10 different planting locations within Bloomfield Township based on infill and replacement needs. This is the third grant Bloomfield Township has received through membership with the ARC resulting in over 250 trees being planted within Bloomfield Township.
