The Village at Bloomfield taking shape

It doesn’t look like much … yet. But it’s getting there.

Once the biggest eyesore in the Bloomfield Township area, what used to be known as Bloomfield Park is steadily being transformed into a major retail and living complex.

Gone are most of the decaying old partially completed structures. Roads within the approximately 86-acre site on Telegraph north of Square Lake Road are taking shape, defining the landscape and giving an orderly design to what was a chaotic wreck just a few years ago.

Now renamed the Village at Bloomfield, the site is being developed by Redico (Real Estate Development and Investment Company) of Southfield.

One of the key elements will be a Henry Ford Health Systems medical center, an 84,000-square-foot facility.

Aldi, the national food chain, also will open a 22,565-square-foot facility on the site. Also coming will be a Menards home improvement store and a Hampton Inn hotel with 101 rooms. And 432 apartments with club house, pool and community park will be developed by Edward Rose & Sons as the residential component of the Village of Bloomfield on 32 acres.

In all, about 80 percent of the planned development for the Village at Bloomfield is now leased, said Patti Voelker, director of the Planning, Building and Ordinance Department for the Township. Construction should be completed in the next few years.

That should bring an end to one of the most convoluted, wrenching development stories in the history of Bloomfield Township.

It began in 2000 with the grandiose plan put forward by Harbor Cos. to build a $2 billion development including 1,500 condos and lofts, shops, offices a theater and more. Facing a skeptical Bloomfield Township Board of Trustees, which noted that the Township did not allow 20-story buildings, as was proposed, the developer worked with the city of Pontiac to have the site annexed by Pontiac through an election process.

But that was just the beginning of the saga. A tangle of lawsuits followed and there were conflicts over design elements like water and sewer lines, construction of an emergency drive, wetland approvals and concerns about traffic. The project crept forward but money problems persisted. There were suits and countersuits between the developer and lenders with the project going into foreclosure in 2006. Then in 2008 the great recession hit and that brought the project to an end.

And so it just sat until Redico came along. The Village at Bloomfield is the most high profile development in the Township, but hardly the only one. Erhard BMW, At Home, LifeTime Athletic, Nino Salvaggio and Restoration Hardware are just a few of the larger commercial buildings in town. They complement new residential developments like Baron Estates on Long Lake Road and Legacy Hills on Squirrel Road.

And all attest to the Township as a desirable place to live, shop and work.

The Henry Ford medical center will be a key component of the Village at Bloomfield.

Get ready for the November election

Opportunity abounds for Bloomfield Township voters in the November 6, 2018 Election. This event will change the face of Michigan’s state-wide government as ballots are cast for the next governor, attorney general, secretary of state, state senators, state representatives and other offices, as well as proposals. If you are not a registered voter in Bloomfield Township, please note that the last day to register for this election is Tuesday, October 9, 2018.

For those voting at a precinct for the first time since November 2016, ballots will be tabulated on new election equipment, which was rolled out by the Bureau of Elections in 2017. The digital scanning machines are state-of-the art.

If you want to avoid long lines at the polls, request an absentee ballot. The application is available online at [https://www.bloomfieldtwp.org/Resources/Forms/Clerk/ApplicationForAbsentVoterBallot.asp](https://www.bloomfieldtwp.org/Resources/Forms/Clerk/ApplicationForAbsentVoterBallot.asp) or by calling the Clerk’s Office. To qualify for an absentee ballot, the voter must meet one of the following reasons: 1) 60 years of age or older; 2) anticipated absence from the community in which the voter is registered for the entire time the polls are open on election day; 3) physically unable to attend the polls without the assistance of another; 4) unable to attend the polls because of religious beliefs; 5) appointed as an election inspector in a precinct other than the precinct where the voter resides; and 6) unable to attend the polls because the voter is confined to jail awaiting arraignment or trial.

The last day to request an absentee ballot by mail is Saturday, November 3, 2018. Over-the-counter requests continue until 4:00 p.m., Monday, November 5, 2018. Don’t wait until the last minute.

As always, feel free to contact the Clerk’s Office for any questions or concerns regarding the voting process. You can reach the clerk, Jan Roncelli, and staff at 248-433-7702 or by email at clerk@bloomfieldtwp.org.

Accessory structures need approval

As warm weather settles into Bloomfield Township, many homeowners are interested in doing exterior renovations and expanding their outdoor living space.

Homeowners may not be aware that pergolas, sheds, piers and pillars, and outdoor kitchens are considered accessory structures and are regulated by the Township’s Clear zoning Ordinance. As a means to minimize impacts on adjacent neighbors, approval from the Zoning Board of Appeals is required for accessory structures.

The ZBA addresses the placement, height, screening, and other circumstances of an individual request. In addition to Township Ordinances, there may be deed restrictions governed by an individual Homeowners Association. Homeowners are encouraged to contact their Association prior to making an application to the ZBA. Residents who have questions about a project should contact the Planning Division at 248-433-7795 before installing a shed or other accessory structure.

Homeowners may visit our website at [www.bloomfieldtwp.org](http://www.bloomfieldtwp.org) to obtain the Zoning Board of Appeals application and review guidelines. It should be noted that a permit from the Building Division may be required if the Zoning Board approves the proposed structure.

We look forward to helping residents turn their plans into reality.

Check the dashboard

How does Bloomfield Township stand financially compared to other communities?

You can find out at a glance by looking at the dashboard. It can be found on the home page of the Township website, [www.bloomfieldtwp.org](http://www.bloomfieldtwp.org). Just look for Citizens’ Guide and Dashboard under Quick Links at the right of the home page.

A wide array of financial information about the Township – and information about communities across Michigan – is available on the site.
A NOTE FROM
Leo Savoie, Bloomfield Township Supervisor

Lake rescuers earn a well-deserved honor

You don’t have to go far in Bloomfield Township to find a beautiful lake. We are blessed with an abundance of them, and they help define the Township as a special place to live.

But like just about everything else, lakes require a lot of tender, loving care to thrive. While they may seem to be wild bits of nature, in fact they can be very fragile ecosystems. They are susceptible to pollution, erosion, man-made intervention and some persistent invasive vegetation.

People who live along the lakes know the pleasure – as well as the challenges – of having a home there. Two residents in particular have taken on a key challenge in a remarkable way and achieved statewide recognition for what they have accomplished.

Mike West and Ron Cousineau, both residents of Upper Long Lake, were recently named as Riparians of the Year by the Michigan Lake and Stream Associations. The recognition came after nearly a 10-year battle against one of the biggest threats facing our lakes. It’s called Phragmites. These are particularly invasive reed-like plants that can grow up to 18 feet tall. Phragmites can quickly take over an area, forcing out native species of plants. And once they take root, they are extremely difficult to remove.

In 2009 West and Cousineau noticed that a stand of Phragmites had sprouted on a small island in Upper Long Lake. The traditional means of fighting Phragmites is a combination of chopping, burning and spraying the area with plant killing chemicals. But that often wasn’t effective and West and Cousineau didn’t like the idea of using poisonous chemicals. So after carefully researching Phragmites, West and Cousineau mapped a plan of action to carefully cut the plants at certain times when the water levels of the lake varied. Without getting too technical, it’s enough to say that the plan worked, as the cut plants were essentially drowned by the lake water.

It’s labor intensive, especially without doing great damage to the environment.

In 2009 West and Cousineau noticed that a stand of Phragmites had sprouted on a small island in Upper Long Lake. The traditional means of fighting Phragmites is a combination of chopping, burning and spraying the area with plant killing chemicals. But that often wasn’t effective and West and Cousineau didn’t like the idea of using poisonous chemicals. So after carefully researching Phragmites, West and Cousineau mapped a plan of action to carefully cut the plants at certain times when the water levels of the lake varied. Without getting too technical, it’s enough to say that the plan worked, as the cut plants were essentially drowned by the lake water.

It’s labor intensive, especially when the plants grow to towering heights, but it works. Very quickly, other communities dealing with Phragmites took an interest in the technique pioneered by Cousineau and West and are implementing it.

Two things stand out here, in addition to how successful Cousineau and West have been. First is the skill with which they attacked this problem; the second is their dedication. This is not an easy problem to fix, but West and Cousineau took a measured approach to the issue and by careful experimentation crafted a plan of action. It wasn’t easy. It took a lot of work – tough work slogging in the mud and murky water. But they didn’t give up. In the end they won. They protected their lake.

Our lake, actually, for what they did benefitted the entire Township. And what they did will impact other communities as more adopt the process they pioneered.

Being named Riparians of the Year may seem like an odd-sounding tribute but it is a genuine one. I’m proud of Ron Cousineau and Mike West. We all should be.

Mike West and Ron Cousineau display their Riparian of the Year awards on the shore of Upper Long Lake.

Keep current with the e-Newsletter

You can find out what’s happening in town every week through the Bloomfield Township eNewsletter. The eNewsletter is sent out every Thursday to subscribers. It contains items on what’s happening in the area as well as timely announcements, including snow emergencies and other weather alerts, changes of office hours and news bulletins. ENewsletters are also sent whenever there is an immediate need to relay information to the public.

You can subscribe to the eNewsletter by going to the Township website, www.bloomfieldtwp.org, and clicking on the E-Newsletter link under Quick Links at the right side of the page. You may also send your email address to gkowalski@bloomfieldtwp.org and it will be added to the subscription list. Local non-profit organizations may submit items for inclusion to gkowalski@bloomfieldtwp.org.
Besides fighting fires and providing other essential services, the Bloomfield Township Fire Department has been helping residents recently discharged from a nearby hospital gain back their strength — and was recently recognized for these efforts.

The Department was awarded the Mercy Legacy Award by the St. Joseph Mercy Oakland Hospital for participating in the Remote Specialist Visiting Providers (RSVP) program since 2015, at a recent awards ceremony at the Townsend Hotel in Birmingham.

Celebrity speaker at the event was Matthew Stafford, quarterback with the Detroit Lions. Stafford and his wife Kelly are patents of identical twins girls who were delivered at St. Joseph Mercy Oakland in 2017.

The hospital wanted to honor the Township Fire Department for its community service with recovering residents.

By participating in RSVP, the Fire Department visits the homes of patients recently discharged from St. Joseph Mercy Oakland and helps the individual follow recommendations and instructions given by the hospital. The paramedics also inspect the home in order to ensure it is safe for the resident.

Reiterating the success of the effort, Chris Whitehead, Operations officer for the Department, said that with this Fire Department service only 11 percent of high-risk patients were readmitted to the hospital, far better than typical figures recorded without the program.

A plaque honoring the department for this achievement is on display at the Township’s Central fire station.

Senior Services provides Meals on Wheels to residents

Could you use some help with hot meals? Or do you have a neighbor who could benefit from hot meal delivery? Bloomfield Township Senior Services offers home delivered meals to seniors ages 62 and older who have difficulty shopping for and preparing complete meals independently. Meals are delivered by volunteers Monday through Friday between 10 a.m. and noon.

Meals on Wheels also acts as a safety net for seniors by providing pleasant contact with volunteers with each meal. Over 80 volunteers provide meal delivery and a key element of social contact for seniors who may be unable to get out of their homes on a regular basis. A MOW recipient said, “The volunteer drivers are more than courteous. I get to know the people who deliver and I even get to know a little something about their lives. They have become my friends.”

In 2017 volunteers delivered over 8,000 meals to Township seniors, 50 percent of whom are over the age of 85. There is a cost for this service and support for low-income recipients. “The meals are delicious! They are hot when they are supposed to be hot and cold when they are supposed to be cold,” one recipient said. “I so appreciate the service.”

Buildling Division offers some summer maintenance tips

- A/C condensers should be inspected to ensure that the coils are clean and free of debris. Tidy up around the AC condenser. Remove debris and leaves that have fallen on or into the unit. Tip: Leaving the AC on, but at a higher temperature setting while you’re away will result in reaching your comfort level sooner once you’ve returned. In addition, the AC will run less often – saving you money.
- Re-finishing your deck as necessary. There’s no time like the present to give your deck the once over. Re-treating it will enhance or restore its beauty and may make it last even longer.
- Thoroughly clean and check your barbecue grill. Check the gas line and burners for signs of age and maybe a spider nest or two. Replacement parts can be purchased wherever outdoor grills are sold. Don’t forget to turn the gas tank off after every use.
- Pool gates and other access to the pool areas should be inspected for proper operation. Lubricate the working parts of your pool gates to make sure that they close and latch on their own. If you have doors that access the pool area, ensure that they are alarmed and functioning correctly. Refresh your memory on how to quickly deactivate the pool’s suction pump in the event of an emergency.
- Sprinkler heads should be directed away from your home’s foundation. This will help minimize soil erosion next to the walls and will help to reduce the likelihood of water infiltration.
- Anti-siphon devices should be installed at each of your hose bibs to eliminate the possibility of any lawn chemicals or pesticides that may be applied through the hose from getting into the potable water supply.
- Gutters should be checked and maintained. Check for leaking joints or nails that are not secured properly. Check fire extinguishers to ensure proper placement and charge dates. It’s always a good idea to have a fire extinguisher handy. Some possible locations may be in the garage, the kitchen, the basement or near your gas-fired equipment/appliances. Check with the Fire Department for the proper size and type for each application.
- Trip and re-set your electrical circuit breakers. Devices work more efficiently if exercised once in a while (you may need to re-set your clocks). Installing GFCI receptacles in the kitchen, bath, basement, garage, and at outside locations is always a good safety investment.

Please feel free to contact any of the inspectors at the Building Division, 248-433-7715, if you have code-related question.
Taking out the trash has a special meaning in Bloomfield Township.
Throughout the year, the Township hosts events that allow residents to dispose of items that can’t, or shouldn’t, just be tossed in a trash can.

In April the Township hosted the Electronic Recycling, Medication Disposal and Paper Shredding event. As usual, it was a huge success. More than 1,230 cars pulled onto the Township campus to drop off the material for safe disposal.

That event was followed in May with the Household Hazardous Waste Drop-Off Day. In all, 942 cars came through the campus with loads of old paint, weed killer and other substances that shouldn’t just be poured down the drain.

“Our numbers were good,” said Katie Fotherby, DPW manager, who coordinated the events. The participation shows these are among the most popular services the Township provides. Next Household Hazardous Waste Drop-Off Day will be Oct. 6.
